## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was the self-destructive safety syringe with a plunger having a coupling member with an inclined guide face and a stem member located on the first end of the plunger and extends from the inclined guide face, wherein a lengthwise long slit extends from the stem to the coupling member, but the slit doesn't extend to the distal terminus end of the coupling member and stem portion in combination with the other elements or steps of the claim.

The examiner also considered page 4 and 5 of the remarks section of the amendment dated 7/24/06.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
